Academy of Managed Care Pharmacy 2015

Electronic prior authorization eases burden

April 27, 2015

Using an electronic prior authorization program can save money and time for patients, providers and pharmacists.

New model for managing specialty pharmacy aims to improve quality at a reduced cost

April 27, 2015

Both public and private purchasers are in an important position to act as catalysts of change in managing specialty pharmacy.

Control of the pharmacy benefit is in play with Medicaid expansion

April 27, 2015

Despite the influx of enrollees into managed Medicaid plans as a result of Medicaid expansion, more states are maintaining control of the pharmacy benefit by aligning managed care formularies with the state's current preferred drug list.

Managed care industry needs to know where exchanges are headed

April 26, 2015

To stay on the forefront of trends in formulary management, managed care needs to know where the market is headed and be able to determine strategy both inside and outside of health insurance exchanges.

Including cost-effectiveness data in formulary review

PCORI helps guide use of new treatments in real-world setting

April 26, 2015

To help clinicians, patients, and other stakeholders make informed health care decisions and improve healthcare delivery and outcomes, comparative research on newly approved therapeutics is needed to understand how these agents work in the real-world setting and how they fit into the treatment armamentarium.

A properly designed compounding benefit can help control costs and quality

April 25, 2015

A properly designed compounding benefit that works with industry providers is more effective at controlling costs and quality than a negative approach that can limit patient care and potentially increase costs.

Better health, lower costs the result of incorporating pharmacists in the management of complex patients

April 25, 2015

Incorporating pharmacists into a team approach for care of patients who require specialty pharmacy services can help manage cost and improve medication adherence.

The benefit of patient-focused MTM services

April 25, 2015

If the approach to medication therapy management (MTM) is flexible, integration of MTM services into the design of a health plan can impact plan performance and result in a positive return on investment.

New data: Hospital readmission among NVAF hospitalized patients treated with new oral anticoagulants

April 24, 2015 By Tracey Walker

Data from a real-world analysis provided an early view of hospital readmissions among hospitalized nonvalvular atrial fibrillation (NVAF) patients treated with new oral anticoagulants (NOACs).
